

# Theory of Physics; A Rectification of the Theories of Molar Mechanics, Heat, Chemistry, Sound, Light, and Electricity

Filesize: 7.11 MB

## ***Reviews***

*Comprehensive manual for ebook fans. I am quite late in start reading this one, but better then never. Its been written in an exceptionally basic way and is particularly merely soon after i finished reading this publication in which really changed me, affect the way in my opinion.*

***(Prof. Antone Olson II)***

## THEORY OF PHYSICS; A RECTIFICATION OF THE THEORIES OF MOLAR MECHANICS, HEAT, CHEMISTRY, SOUND, LIGHT, AND ELECTRICITY

To download **Theory of Physics; A Rectification of the Theories of Molar Mechanics, Heat, Chemistry, Sound, Light, and Electricity** PDF, you should access the web link listed below and save the document or have accessibility to other information that are have conjunction with **THEORY OF PHYSICS; A RECTIFICATION OF THE THEORIES OF MOLAR MECHANICS, HEAT, CHEMISTRY, SOUND, LIGHT, AND ELECTRICITY** book.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1890 Excerpt: .distance in proportion to the course which has to be traversed in such changes, otherwise a complete contradiction would result to the fundamental law of mechanism, which is the principle of conservation with its corollary inertia of matter. Closely studying the act of production of electricity in the battery, and seeing the molecular transportations produced in chemical reactions, we See Principles of Universal Physiology, Chap. IX. cannot do less than compare chemic to magnetic phenomena, and establish a great analogy between them--with this difference alone, that a chemical metamorphosis is like a molecular magnetism. Thermo-electric currents show us that in the propagation of heat by conduction this change is double, as there is not only the oscillatory propagation which produces molecular expansion, but there is also a flow of progene in the direction of the propagation; this is the origin of dynamic electricity produced by heat. The same reflection is applicable to all chemical metamorphoses, and for this reason we have asserted its similarity to magnetic action. Any lack of equilibrium in progenic tensions gives rise to movements which appear to produce attractions and repulsions; therefore, such movements do not represent causing forces, but forces resulting from different pressures of progene. The tendency which appears in nature to approximate bodies and particles to one another--that is, universal attraction, so-called--proceeds from progenic movements which constantly exist. Let us suppose, for instance, two bodies in proximity, and with different progenic tensions, separated by a movable means like the...
