

## Algal Development: Molecular and Cellular Aspects

Filesize: 8.49 MB

### **Reviews**

*The book is great and fantastic. It is written in straightforward words and phrases rather than difficult to understand. You won't really feel monotony at any time of your respective time (that's what catalogues are for regarding should you question me).*  
(Payton Miller)

To read **Algal Development: Molecular and Cellular Aspects** PDF, make sure you access the hyperlink listed below and save the file or have accessibility to additional information that are relevant to ALGAL DEVELOPMENT: MOLECULAR AND CELLULAR ASPECTS book.

Springer. Paperback. Book Condition: New. Paperback. 204 pages. Dimensions: 9.6in. x 6.7in. x 0.6in. Although the 32 kDa-polypeptide (O-1) is a minor component of thylakoids in algae and higher plants, much attention has been focused on it. It was shown to be the binding site for herbicides (Pfister et al. 1981), the rapidly synthesized polypeptide of thylakoid membranes (Edelman and Reisfeld 1978; Owens et al. 1982) and to participate in Qa binding (Arntzen et al. 1984; Kyle et al. 1984; Ohad et al. 1984). Measurements of the stoichiometry of the various PS II polypeptides in *C. reinhardtii* showed that thylakoids contain about one herbicide binding polypeptide per one PS II unit and the accelerated light stimulated turnover of the 32 kDa-polypeptide was postulated to be the consequence of its function in quinone reduction. Based on comparison of amino acid sequence and hydropathy profile homologies of O-1 and O-2 with the subunits of the bacterial photosystem, recently a model was presented, in which the reaction center of photosystem II in algae and higher plants is formed by the polypeptides O-1 and O-2 (Trebst 1986). The structural gene of the 32 kDa-polypeptide (psbA) has been mapped on the chloroplast DNA and cloned from various plant species (for a review: Kyle 1985). The polypeptide is synthesized as a precursor on ribosomes bound to unstacked lamellae and there processed to its mature form (Edelman and Reisfeld 1978; Herrin and Michaels 1985). In *C. reinhardtii* the O-1 polypeptide is phosphorylated by a light-activated membrane bound kinase. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
