RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 48 pages. OCLC Number: (OCoLC)123905209 Subject: United States -- Armed Forces -- Supplies and stores. Excerpt: . . . they have more management control over their internal processes than over external contractor practices. Officials stated that variability always exists when generating lead time estimates, but they agreed that improved and more reliable lead time estimates can contribute to lower levels of inventory. They also stated that understated lead time estimates can result in backorders or part shortages which may impact a units readiness if the needed spare parts are not available when expected, and overstated estimates result in prematurely obligating funds that could have been used for other military needs and can unnecessarily increase inventory levels and associated costs. The Army tended to underestimate their acquisition lead times and receive Army Tended to items later than expected. Of the 9, 380 Army deliveries we reviewed, more Underestimate Lead Time than 58 percent of their actual acquisition lead times were more than 90 Estimates days longer than their estimated lead times. This represented about 10. 6 billion worth of inventory arriving later than expected. Additionally, almost 12 percent had...

Reviews

An exceptional pdf and the typeface utilized was fascinating to read through. It can be writter in straightforward words and phrases instead of confusing. I am just quickly could possibly get a delight of looking at a written ebook.

-- **Prof. Arlie Bogan**

It in a single of the best book. This is for those who statte there had not been a well worth reading through. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Dr. Barney Robel Jr.**
