

A Brief Guide to the Great Equations: The Hunt for Cosmic Beauty in Numbers

By Crease, Robert P.

Robinson. 1 Paperback(s), 2009. soft. Book Condition: New. In this follow-up to *The Prism and Pendulum: The Ten Most Beautiful Experiments in Science*, science writer and columnist Robert Crease relates the stories of the 10 most popular equations of all time as voted for by readers of *Physics World* and provides accessible descriptions. Each one captures a complex expression with beautiful simplicity, including the equation known as Euler's identity, the "greatest equation ever" according to the magazine's readers, as well as Maxwell's equations of electromagnetism. 313.

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Ally Reichel**

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You won't feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).
