By Dennis McCullough

Harper Paperbacks. Paperback. Book Condition: New. Paperback. 288 pages. Dimensions: 7.8in. x 5.3in. x 0.8in. Thanks to advances in science and medicine, our parents are living longer than ever before. But our health-care system doesn't perform as well when decline eventually sets in. We want to do our best as our loved ones face new complications more diseases and disabilities demanding further need for support and careful judgment, but the choices we have to make can seem overwhelming. Family doctor and geriatrician Dennis McCullough recommends a new approach: Slow Medicine. Shaped by common sense and kindness, it advocates for careful anticipatory attending to an elder's changing needs rather than waiting for crises that force acute medical intervention thereby improving the quality of elders' extended late lives without bankrupting their families financially or emotionally. This is not a plan for preparing for death; it is a plan for understanding, for caring, and for helping those you love live well during their final years. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.

Reviews

Extensive information for book fans. It is written in basic words and never hard to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

This publication is great. It is full of wisdom and knowledge. You will not really feel monotony at any time of the time (that's what catalogs are for relating to when you ask me).
